The HuberCal® Oyster Shell Advantage

Supplement Versatility

Trust the market leader. Know the Huber Oyster Shell difference. Insist on authentic

Huber Health and Nutrition offers the nutritional supplement formulator a directly compressed Oyster Shells. HuberCal Oyster Shell calcium carbonate is harvested directly from oyster shells that are tens of thousands of years old.

What is the source of the oyster shell granulations used in your calcium supplement

While many calcium carbonate suppliers claim to offer oyster shell supplements, many simply do not. Huber sources high purity, genuine oyster shells directly from a domestic supplier. Break open your calcium supplement tablets. If the interior of the tablet is grey, you are getting genuine oyster shells supplied from Huber Health and Nutrition. If the interior is white, you are getting limestone powder and not genuine oyster shells. [Call or email us](#) today to learn more about the difference.

HuberCal oyster shell granulations are also offered with standard binder systems that include various binders and combinations of these materials. Granulations using other binder systems and other materials are available by special request.

High standards of purity and quality

HuberCal oyster shell granulations go through a rigorous and thorough screening and testing process to ensure only the highest quality formulations. An exclusive double-wash technology ensures that only the highest quality formulations are used. HuberCal oyster shell products not only comply with the highest standards for lead, they also offer the lowest levels of lead for natural calcium carbonate (as determined by Coast Analytical Laboratory). This is why HuberCal oyster shell calcium carbonate has earned the standard for quality throughout the nutrition industry.

HuberCal® oyster shell calcium carbonate by Huber comes in two forms -- powder and granulated. The top photo above to the right shows two calcium supplement tablets broken open. The tablet to the right is a genuine oyster shell calcium supplement made with oyster shells supplied by Huber Health and Nutrition. The tablet on the left is limestone manufactured by a competitor; not genuine oyster shells. Insist on oyster shell authenticity in your formulation.
