

Material Protection

DODECYLGUANIDINE HYDROCHLORIDE

35% DGH solution in isopropanol.

For the control of algae, bacteria, fungi, and molluscs.

Use in a wide range of industrial process waters; air washing systems, industrial recirculating water cooling towers, oil field water systems, oil recovery drilling fluids, sewage disposal lagoons and pulp & paper mill systems.

It can also be used for material preservation such as adhesive systems (non-food contact); paints, coatings & stains; pigments, dyes & filler suspensions; polymer dispersions & emulsions; pulp & paper mill processing and food packaging.

Use biocides safely. Always read the label and product information before use.

Approved applications and uses vary by region. For up to date approved applications and uses, please contact your local LANXESS representative.
